

SeiraTM

Verticillium lecanii

Seira is a naturally occurring entomopathogenic fungus used as a bio-insecticide for the effective management of soft-bodied and sucking pests. It is favored for its safety, eco-friendliness, and compatibility with organic farming programs, making it widely adopted in integrated pest management.

Product Overview

Active Ingredients

Verticillium lecanii

Formulation Type

Wettable Powder (WP)
/ Oil Dispersion(OD)

Application Guidelines

Dosage (per acre)	Potency
200 - 500 ml	1 × 10 ⁹ CFU/mL
Dosage (per acre)	Potency
200 - 500 g	1 × 10 ⁹ CFU/g

Pests Controlled

Mealybugs, Thrips, Jassids, Aphids, Whiteflies, Scale insects, Sucking pests on vegetables, fruits, pulses, plantation crops, and ornamentals.

Key Benefits

- Highly effective against sap-sucking pests.
- Safe for beneficial insects, pollinators, and the environment.
- Compatible with integrated pest management (IPM) programs.
- Leaves no harmful residues on produce.
- Improves plant vigor and health through biological balance.
